ABERDEEN INTERNATIONAL AIRPORT (EGPD) - CRANE OPERATIONS IN THE VICINITY OF THE AIRPORT - REPLACEMENT FOR SUP 046/2020

1 Introduction

- 1.1 Due to the work undertaken by companies with facilities on and in the vicinity of Aberdeen International Airport, crane activity is occasionally required at very short notice and for undetermined periods. The location and height of selected cranes is such that their promulgation as an obstacle is required but the short notice and varying duration of the crane operation means that NOTAM promulgation or listing in the UK AIP AD Section is not always practical. This Supplement contains the positions of all cranes/obstacles that fall into this category. The data below will be regularly reviewed and the information revised accordingly.

2 Crane Data

- 2.1 The cranes/obstacles contained in the list below are only temporary obstacles, however due to the random nature of their operation aircraft operators may elect to consider them to be operational on an H24 basis. These obstacles may not always be lit.
